

Suggestions for enhancement of UI/UX

Favorite:

- Improve password security, because the user can get to Favorites without entering a valid password or even enter any password (combination of letters and numbers)
- Deleted projects should not remain in Favorites
- When a user wants to navigate to the project, there should always be the same link as on the Home screen and also in Favorites
- “Welcome to Favorite” message move to up on the screen, will be more efficient
- Notification when a user removes a project from Favorites
- Hover text above project names/tiles in Favorites
- Invalid password message move to up on the screen, will be more efficient

Home:

- Hover text above project names/tiles in Home screen
- Fix the programming languages in the drop-down menu. When the user presses the ENTER button in "Search repositories", the number of programming languages increases
- “Repository has been added” notification move to up on the screen, will be more efficient
